

SEDIMENT CARTRIDGES

SF Series
Silt * Rust * Particles

- Melt-blown method, no bonding agent
- Removal of sand, silt, dirt and rust particles
- Polypropylene material conforming to FDA standard
- Absolute assurance of filtration efficiency
- High chemical resistance
- Low pressure drop

These depth filters are produced with pure polypropylene resin, which meets the requirement of FDA Title 21 of the Code of Federal Regulations 177.1520 for direct and indirect food contact. Melt Blown Depth Filter Cartridges take advantage of our innovated continuous multi-extruded technology and the latest melt blowing micro-fiber technology.

Recommended Replaceable Pressure Drop	20 psi
Maximum Temperature	140° F
Filter Media	100% polypropylene, melt-blown thermal bond fiber
Retention Ratings	5 micron standard (nominal) other microns available
Dimensions	Inside diameter: 1.1"
	Outside diameter: 2.5", 4"
	Lengths: 9-7/8", 20", 30", 40"
